Proposed by Jafar Nikpour-Iran

Solution by Daniel Sitaru-Romania

$$\text{In } \triangle ADB: m(\sphericalangle ADB) = 180^\circ - 30^\circ - 50^\circ = 100^\circ$$

$$\text{In } \triangle ADC: m(\sphericalangle ADC) = 180^\circ - 100^\circ = 80^\circ, m(\sphericalangle DCA) = 180^\circ - 80^\circ - 70^\circ = 30^\circ$$

$$\begin{aligned} &\text{In } \triangle ADB: \\ \frac{a}{\sin 50^\circ} &= \frac{b}{\sin 30^\circ} \Rightarrow b = \frac{a \sin 30^\circ}{\sin 50^\circ} \end{aligned}$$

$$\begin{aligned} &\text{In } \triangle ADC: \\ \frac{a}{\sin 30^\circ} &= \frac{c}{\sin 70^\circ} \Rightarrow c = \frac{a \sin 70^\circ}{\sin 30^\circ} \end{aligned}$$

$$\frac{1}{a} + \frac{1}{c} = \frac{1}{b} \Leftrightarrow \frac{1}{a} + \frac{1}{\frac{a \sin 70^\circ}{\sin 30^\circ}} = \frac{1}{\frac{a \sin 30^\circ}{\sin 50^\circ}} \Leftrightarrow 1 + \frac{\sin 30^\circ}{\sin 70^\circ} = \frac{\sin 50^\circ}{\sin 30^\circ}$$

$$\sin 70^\circ \cdot \sin 30^\circ + \sin 30^\circ \cdot \sin 30^\circ = \sin 50^\circ \cdot \sin 70^\circ$$

$$\sin 30^\circ (\sin 70^\circ + \sin 30^\circ) = \sin 50^\circ \cdot \sin (90^\circ - 20^\circ)$$

$$\frac{1}{2} \cdot 2 \sin \frac{70^\circ + 30^\circ}{2} \cos \frac{70^\circ - 30^\circ}{2} = \sin 50^\circ \cos 20^\circ$$

$$\sin 50^\circ \cos 20^\circ = \sin 50^\circ \cos 20^\circ$$
